Jerry Dempsey

Product and Application Security Leader

More than 20 years of experience in cybersecurity with outstanding communication skills and expertise in recruiting and mentoring top-performing teams. As a Product and Application Security leader, I possess outstanding communication skills and excel at recruiting and mentoring top-performing teams. I am a proven problem-solver with a knack for finding creative solutions to complex challenges. I am also an advocate for forward-thinking security concepts, and I am committed to driving collaboration and partnership with development organizations to help them adopt cutting-edge security strategies.
